Technical Skill

- HTML | CSS | JavaScript | React
- Node.js | MongoDB | Express.js
- GitHub | Data Structure

Soft Skill

- Team Collaboration
- Communication Skill
- Adaptability

Education Background

- Full Stack Web Development (Full Time)
3RI Technologies, Pune
08/22 - Current
- Bachelor Of Commerce
Sant Gadge Baba Amravati University
11/20 - 05/23
- Higher Secondary Education
Smt. Kesharbai Lahoti Mahavidyalaya, Amravati
06/19 - 04/20

Hobbies

- Do it yourself (DIY)
- Listening to music

Professional Summary

Enthusiastic and well-organized full stack developer with 2500+ hours of rigorous coding experience. Eager to join, to bring in top-class full stack development and problem-solving skills.

Projects

My Inventory Hub

Effortless inventory control. Multiple users, independent databases. Manage products with precision and privacy. Simplify your inventory journey.

Features:

- Individual accounts grant users autonomy in managing unique product databases securely.
- Robust privacy measures ensure confidential and personalized inventory control.
- Effortless handling of product details like quantity, price, and manufacturing date.
- User-friendly features, including image integration, enhance precision in inventory organization.

Tech Stack:

- React
- Node.js
- MongoDB

Areas of Responsibility:

- Solo Project.
- Led project development, integrating React for dynamic UI, Node.js for robust backend, and MongoDB for efficient data management. Ensured seamless collaboration, prioritizing scalability, reliability, and responsive user experience.

Flipkart Clone

Enhanced shopping cart and robust product catalog using React, Node.js, MongoDB for seamless, user-friendly shopping.

Features:

- Optimize the shopping cart with user-friendly options for quantity adjustment, product removal, and a concise order summary to facilitate a smooth order placement process.
- Product catalog with categories, subcategories, and detailed product information, featuring images, descriptions, and prices.

Tech Stack:

- React
- Node.js
- MongoDB

Areas of Responsibility:

- Solo Project.
- Led project development, integrating React for dynamic UI, Node.js for robust backend, and MongoDB for efficient data management. Ensured seamless collaboration, prioritizing scalability, reliability, and responsive user experience.
